

Mohamed Jamiyalam A

Innovative front-end developer and UI/UX designer skilled in MERN stack and Figma prototyping. Seeking to build expressive, brand-driven web apps.

Project

Web Developer & Product Builder

Twitter Clone (MERN Full-Stack)

- Built a full-stack social media app with user login, post creation, commenting, and profile updates. Used React for front-end, Node.js and Express.js for backend, and MongoDB with Mongoose for data storage.

E-Commerce App (NestJS & NextJS)

- Developed a scalable NestJS/Next.js e-commerce app using Prisma. Optimized performance via Server Components and automated AWS deployment using Docker and CI/CD.

Self-Initiated Projects

Personal Web Projects

- Designed and built multiple websites with clean UI, dynamic interactions, and responsive layouts. Focused on modular design, animation, and brand-driven storytelling.

Freelance Collaboration

BBNL TV Launcher UI Design

- Designed over 40 screens for a smart TV launcher application using Figma. Focused on clean navigation, consistent design language, and user-friendly layouts.

Squadcube Landing Page

- Built a dynamic, responsive React landing page with multiple interactive sections. Implemented modular components and brand-aligned visuals for storytelling.
